1314 hrs phone call from Chair

REDACTED

- Are you aware the Prime Minster is going to invoke the emergency act
- Emer act suspends and invokes powers i.e. Tow truck drivers cannot refuse to tow
- It could prevent of limit a protest in the area of an infrastructure
- Nothing in there that would remove the OPS from the police of jurisdiction
- Does not indicate there will be a military aid only aid to civil power
- You have a municipal state of emergency, then a provincial and now a federal. I have already said that we need more than just the OPS.
- When asked by Chair if any of my orders were disobeyed during the demonstration, Chief advised there have been major issues with senior leadership team members but he has not had time to do an investigation on what has been going on here. The best and the worst of us have been strained. – this is why there has been tense meetings and why some have not demonstrated their best levels.
- Like everyone, I have been at my best and I have not been at my best
- It has been my ongoing sense; we are very strong in some aspects but weak in others
- OPS has long standing incident command systems, we can do Canada day very , but then when there is something that is longer, the incident commanders do not have the base of level of expertise to draw on;
- When we get something we don't expect - we do not act well.
- At the onset, we did not have core group of senior commanders who have the skill sets we needed - which caused me to go through the different levels of management.

- 3rd area to discuss - some persons took the opportunity to use this for their personal agendas which were not aligned to the mission and objectives.
- I can absolutely prove that significant changes were made to the command team, which was withheld from my knowledge for days, which caused us to miss opportunities – this includes acts by both DC Bell and A/DC Ferguson
- Do I have the evidence to prove it was deliberate misconduct? No, I do not have that evidence at this time but it is all formally documented if needed.
- Cannot and will not the blame on this entirely on these members but it has affected the outcome
- Chief is not aware of anyone deliberately disobeying an order. I have been dealing with the undermining, cliques, and camps that comes out in the organization t it along the way.
